PRESS RELEASE

Wattre Corporation Releases HS-14 Mobile App

Woodburn, IN (February 5, 2013): Wattre Corporation is pleased to announce a HS-14 product demo app release for both Android and Apple smart phones. The app features three sections to give the user a walkthrough of the HyperSpike HS-14.

The first is a product demo section that gives the user the ability to virtually operate the HS-14. Through the product demo section they can scroll through the on board menus, sample alert tones, and play numerous messages available on the actual HS-14.

Next the user can view a computer rendered HS-14 in a full 360° view. By sliding back and forth on the screen, the user can view the HS-14 from any angle along the horizontal axis.

Finally, in the accessories tab, the user can place some of the available accessories of the HS-14 on the unit to see what the final unit will look like with the chosen accessories.

Wattre Corporation is excited to provide this app to potential customers and the general public to allow them to see the functionality, design, and accessories of the HyperSpike HS-14.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
