

## PRESS RELEASE

### Ultra Electronics USSI Launches Wireless HyperSpike Functionality

**Columbia City, IN (May 17, 2011):** Ultra Electronics USSI, manufacturer of the innovative HyperSpike® acoustic hailing devices and mass notification equipment, is pleased to announce a new addition to the ever-growing product line. In an exclusive partnership with VMI, the HyperSpike Remote Control Module (RCM) provides wireless capability to all HyperSpike acoustic hailing devices. up to 500 meters. The new IP67 rated RCM's OLED menu display allows the user to select up to five operating modes: live microphone, delayed microphone, MP3, Auxiliary and wireless mode.

Designed as an easy add-on module, the battle-tested HyperSpike® RCM provides the functionality of a HyperSpike device at a remote safe distance

Pre-recorded messages are stored to the built-in 4 GB MP3 player and transmitted when MP3 mode is selected. With a built-in anti-feedback circuit, squelching or feedback from a live microphone is minimized, providing safety to the operator and the listening area. Using a 2.4 GHz frequency agile transmitter, messages are wirelessly transmitted to the receiver module located with the HyperSpike unit.

**Wattre Corporation** - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
