PRESS RELEASE

HyperSpike HS-40, The Loudest Production AHD in the World, Sold for Marine Application

Columbia City, Indiana (July 11, 2012): Ultra Electronics – USSI announces today that it has received an order for a HS-40 that will be deployed for marine applications.

The HyperSpike[®] HS-40 is the loudest production Acoustic Hailing Device (AHD) in the world. The HS-40 can produce over 160 dB and can send voice messages and alert tones over 2000 meters. Not only can the HS-40 send clear messages over long distances, it can be heard with exceptional clarity. The HS-40's Speech Transmission Index (STI) rating is 0.91 out of 1.0.

"It's nice to see a customer want the best-in-class Acoustic Hailing Device the world has to offer," said Bill Headlee, Program Manager of USSI-HyperSpike Products. "Our HS-40 has an unmatched acoustic output because of its patented design and it is built with state of the art materials."

HyperSpike's development team and highly training engineers have made HyperSpike a market leader in the AHD market. Everyday more customers are turning to HyperSpike technology for its durability, reliability, and voice clarity all product lines incorporate.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
