PRESS RELEASE

Ultra Electronics- USSI Announces HyperSpike HS-18 Remote AHD Order to Protect Oil & Gas Assets

Columbia City, Indiana (July 20, 2012): Ultra Electronics – USSI announces today that it has received an order for our HS-18 Remote Acoustic Hailing Device (RAHD) product to protect Oil & Gas assets in Australia. Integrated with multiple sensor systems, the HS-18 RAHD creates a comprehensive security solution that will include a high-power spotlight and a custom thermal sensor; the latter integrated into the HyperSpike HS-18 OptiPort.

The RAHD is co-developed and manufactured by Ultra Electronics – USSI and MOOG, Inc. and is a critical tool used in the escalation of force measures and security application to the gas and oil assets. The proven QuickSet® pan & tilt quickly and accurately directs the patented HyperSpike HS-18 and any integrated sensor. The system can quickly identify targets, query them up to 1500 meters, and determine intent while keeping security personnel unexposed and safe. Targets can be detected and engaged in any environment, including high heat and cold, common to energy industry installations.

“The RAHD is ideal for the high-security needs of the Oil & Gas companies,” remarked Thomas Link, VP of Audio Products at USSI, “We are receiving more orders for AHD systems as the industry recognizes the value of AHDs in determining intent. The fully-customizable RAHD is ideal since it can incorporate thermal, optical and other sensors increasing the effectiveness of security personnel at protecting high value assets.”

Delivery of the completed order is expected in October of 2012.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
