PRESS RELEASE

Ultra Electronics – USSI Receives Large Order for AHDs

Columbia City, Indiana (September 6, 2012): Ultra Electronics – USSI announces today that it has received a large order for acoustic hailing devices (AHD) from a maritime and security customer.

The AHD's will be used on naval vessels and shore patrol scenarios to help deter and communicate with potential threats that approach maritime exclusion zones. Vessel personnel will have the ability to rapidly deploy and move the high power AHD's anywhere on the ship or onto a land-based situation. Hyperspike AHD's have the ability to communicate with crystal clear voice and unambiguous messages over extreme distances. The AHD's are multi-language capable by using commercially available and rugged MP3 players to play tracks quickly and easily.

“Discerning customers are increasingly choosing HyperSpike AHD's for their AHD applications,” remarked Nathaniel Schueth, Global Reseller Manager, “HyperSpike's winning combination of lightweight, loud, and cost-effectiveness solutions coupled with usability, set it apart from other loud hailing solutions. By choosing HyperSpike products, our customer has indicated that HyperSpike technology is the best solution for saving lives and de-escalating critical situations.”

Messages for HyperSpike AHDs can be quickly recorded and optimized for maximum output with the provided HyperSpike Audio Optimizer software. The HS Audio Optimizer installs and operates on any Windows XP or later operating system. After optimization, tracks can be seamlessly transferred to any MP3 player for immediate playback.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
