PRESS RELEASE

Honeywell Teams with Ultra Electronics to Distribute Acoustic Hailing Devices for the Law Enforcement Market

New line will expand the product offering of Honeywell Tactical Products and will help keep law enforcement personnel safer

Dayton, Ohio (October 6, 2012): Acoustic Hailing Device (AHD) and HyperShield as part of their portfolio of products for law enforcement and prison agencies. Ultra Electronics (USSI) is an innovative global supplier of highly intelligible, rugged, long-range acoustic communication devices and mass notification systems.

The Honeywell private-branded HS-Micro is a light-weight and man-portable acoustic hailing device that has the capability to send clear, intelligible messages over 500 yards. The HyperShield is a riot shield and focused acoustic hailing device combined into one product for the tactical law enforcement user. It gives an officer the protection of a riot shield with the ability to communicate with crowds over 200 yards away with live voice, recorded message or alert tone deterrence. These two products can broadcast live voice and recorded warnings, notifications, and announcements with authority.

“HyperSpike acoustic hailing devices are important tools law enforcement officers can use to stay safe and out of harm’s way while safely helping shape the behavior of crowds that may become unruly,” said Patrick Allison, Business Development Director Audio Products for Ultra Electronics – USSI.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
