PRESS RELEASE

Wattre Corporation Awarded Robotic Sentry Patent

November 30, 2012: Wattre Corporation is proud to announce today that they have been awarded the Robot Sentry with Low Dispersion Acoustic Projector Patent from the United States Patent Office. The patent technology, already in production with the HyperSpike HS-18 RAHD (Remote Acoustical Hailing Device), describes the use of a network controllable directive acoustic hailing device (AHD) being used along with a sensor array to detect, track, and identify a target. Once detected and tracking has been initiated, the AHD can then be used as a one or two way, non-lethal, sound based instrumentality to communicate with and discourage entry into secured zones.

Following in a long list of audio innovations, the issued patents serves as just another example of Wattre Corporations' commitment to innovative research and design.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
