PRESS RELEASE

Wattre Corporation Awarded Contract for Ground Excitation System

Woodburn, IN (December 4, 2012): Wattre Corporation is pleased to announce the latest delivery of Ground Excitation Systems (GES) to the US military. The GES is a HyperSpike based system and is intended for use to detect buried IED munitions in theater. The current generation GES features a lightweight carbon fiber body designed to be flown from manned or unmanned aerial platforms. These systems set new performance benchmarks in focused directivity and low frequency acoustic energy projection.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
