PRESS RELEASE

Wattre Corporation Awarded Contract for Next Generation Train Advanced Warning Device

Woodburn, IN (December 5, 2012): Wattre Corporation is pleased to announce the delivery of the next generation Advanced Warning Device (AWD). The AWD, based upon HyperSpike TCPA technology, is designed to be fielded as the next generation train horn. Due to its increased acoustic directivity and steering capabilities, this device enhances the ability to protect and save lives around train tracks and at crossings while minimizing unwanted noise in surrounding non-target areas. Additionally, the enhanced warnings including verbal and unique tones that provide the train authorities additional tools to increase safety.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
