Ultra Electronics Announces Delivery of Sizable HyperShield Order

Columbia City, IN (December 22, 2011): Ultra Electronics USSI is pleased to announce the delivery of a significant HyperShield order for crowd control communications.

The HyperShield combines the authority of acoustic hailing devices with the ruggedness of carbon fiber to create a shield that can take control and take punishment. The integrated acoustic hailer is capable of 140 dB for background-noise piercing tones and clearly audible commands, even in the most chaotic situation. The HyperShield is capable of being integrated with gas masks and other law enforcement equipment.

“We are confident that the HyperShield will help keep people safe,” commented Thomas Link, Vice President of Audio Products, “both the crowd and the officers enforcing lawful order. The shield will allow situation commanders to communicate and relay messages previously lost, ‘in the crowd.’”

The HyperShields were specifically requested by the customer and are expected to be deployed in 2012 and beyond. Previous users include SWAT teams, corrections enforcement officers, and militaries.

Wattre Corporation - Founded in 2002, Wattre Corporation focuses on creating custom solutions for real world applications. They consist of a customer focused team with 40+ years of combined experience designing both mass produced and innovative custom technology solutions within the audio and acoustics fields. The key to their success is the ability to identify market needs quickly and provide rapid response to custom solutions. Wattre develops products to match clients needs and budgets. In house research and development, engineering, prototyping and manufacturing has paved the way for their unique, patented technologies and proven track record.
